Preface	6
How the Bodilance® method came to being	8
INTRODUCTION	10
The fascinating way our bodies work	10
Development in infancy	13
Fascial tissue	15
ASSESSING THE PROBLEM	17
Imbalance caused by the sensory organs	22
Excessive and deficient tension in the body`s deep postural system	24
Anxiety tension	26
Assessing problems affecting body and psyche.....	29
Inherited and acquired functional disturbances.....	31
ANATOMY.....	33
General description of the functional lines	33
The Superficial Back Line (SBL).....	36
The Superficial Front Line – SFL.....	40
The Deep Front Line – DFL	44
The Lateral Line – LL.....	50
The Spiral Line – SPL.....	55
Reading the functional lines – the principles at work.....	60
The Superficial Front Arm Line – SFAL.....	63
The Superficial Back Arm Line – SBAL.....	65
The Deep Front Arm Line – DFAL	67
The Deep Back Arm Line – DBAL	69
How the functional lines relate to each other.....	71
How the back myofascial lines interact	73
How the front myofascial lines interact	75
SFL, DFL, SPL, DFAL and SFAL	75
How the Arm Lines relate to each other	77
BODY STATICS AND FUNCTION.....	80
The static balance of the legs and its effects.....	80
Functions of the feet.....	82
Functions of the arms and hands.....	87
Breathing and balance.....	88
How does speaking affect balance?	91
Fascial layers.....	92
Fascial functional lines, anterior view	94
Fascial functional lines, posterior view.....	95

TRAINING.....	96
Manual treatment of the fasciae.....	96
How do I give impulses?.....	97
Impulses at the nape, head and upper chest.....	101
Impulses to the hands and arms and to the shoulder girdle.....	103
Impulses to the back and pelvis.....	105
Impulses to the feet and legs.....	106
Symptom-specific impulses.....	110
Verbal impulses.....	114
Work with client lying down.....	116
Working with older clients.....	119
Work with babies, children and adolescents.....	122
MOVEMENT TRAINING.....	124
Willed, conscious movement and impulse-directed movement.....	124
Analysing movement.....	126
Active and passive movement of the limbs.....	129
Reconstructing movement.....	131
CORRECTION DURING SPECIFIC MOVEMENTS.....	135
Walking, running and climbing stairs.....	135
Holding and carrying objects.....	141
Sitting.....	146
Different activities.....	147
Try to change only five percent.....	148
APPENDIX.....	149
INDEX.....	155
